Experience

Software Quality Analyst Engineer | 2022 onwards

Liberty University, Lynchburg, VA

I build fully automated end-2-end testing suites for some of the University's crucial web applications using [Playwright](#). Plus, I test and verify all changes to ensure production ready code.

Testing involves reviewing code changes, using Postman to verify API endpoints, confirming acceptance criteria, and documenting my work.

Projects

[Discrr](#) | 2022

A web app for searching through various disc golf discs to read flight numbers, reviews, and ratings.

[Apex Collision Centers](#) | 2022

A static AngularJS site built for an auto repair center. HTML, CSS, JS

[Covenant Of Snowcreek](#) | 2023

A static AngularJS site built for a church. HTML, CSS, JS

[Boardlo](#) | 2024

An ongoing project to build a dynamic site for School Boards' policies, meetings, and general information. NextJS, Tailwind, SQLite
